

Jerry W. Pierre

305.354.0969 | jerrywpierre023@gmail.com | Miami, FL | <https://www.linkedin.com/in/jerry-w-pierre/>

PROFILE SUMMARY

- 7+ years of hands-on experience as a Full-Stack Software Developer designing & deploying scalable web applications using Next.js, React, Node.js, Supabase, and Tailwind CSS across multi-tenant architectures.
- Led end-to-end product development from concept and prototyping to deployment and iteration for startups and workforce technology platforms.
- Built AI-powered applications using LangChain, OpenAI, and RAG pipelines.
- Experienced in CI/CD pipelines, agile workflows, and scalable UX design.

SKILLS

PROFESSIONAL SKILLS

AI-Powered Application Development | Full-Stack Software Engineering | Startup Product Development | Workforce Platforms | Data Infrastructure | Platform Scalability | NLP & RAG Pipelines | User Experience Optimization | Analytical Problem-Solving | API Development | Algorithmic Trading | Product Design | Rapid Prototyping

TECHNICAL SKILLS

Languages & Frameworks: Python | JavaScript (Node.js, React.js, Next.js Express) | HTML5 | CSS3 | Sass | Flexbox | Bootstrap | Tailwind CSS | NPM | MQL5 | Pine Script
AI/ML: OpenAI | LangChain | Hugging Face | Prompt Engineering | Vector Databases (Supabase)
Databases & Tools: MySQL | Supabase | REST APIs | Web APIs | OAuth | Puppeteer | XGBoost | TensorFlow
Cloud & DevOps: Vercel | Heroku | Visual Studio Code | Cursor (AI IDE) | CI/CD pipelines | Git/GitHub | JIRA | Chrome DevTools | Jest | Enzyme
Design & Prototyping: Figma | Adobe Creative Suite | Sketch
Other: SolidWorks, Microsoft Office Suite, Raspberry Pi (IoT projects)

WORK EXPERIENCE

Founder, Chief Technology Officer & Lead Engineer

Patterned LLC | Miami, FL | Oct 2023 – Present

- Developed [Patterned.work](#) — a workforce development platform connecting justice-impacted individuals, veterans, and the unhoused with training programs and hospitality job placements.
- Designed **scalable, multi-tenant architecture** using **Next.js**, **Supabase**, and **Tailwind CSS**, supporting role-based authentication for workers, employers, and admin partners.
- Engineered **real-time matching algorithms** that filter candidates by skillset, certification, geolocation, ratings, and availability to automate last-minute staffing for venues and events.
- Built a **modular API layer** to integrate with workforce partners, nonprofit CRMs, and municipal databases for seamless candidate referrals and employer job postings.
- Leveraged **Cursor AI IDE** to accelerate prototyping and code refactoring for LangChain-based AI applications.
- Led all **DevOps** workflows including CI/CD pipelines, version control with GitHub, staging/production deployment on Vercel, and database migrations in Supabase.
- Oversaw **end-to-end product lifecycle** — from requirements gathering with city agencies to iterative feature delivery in agile sprints.

Software Engineering Fellow

HeadStarter AI | Remote | Jul 2023 – Aug 2024

- Completed fellowship focused on AI-powered application development for startups.
- Developed and deployed **RAG-based AI solutions** with LangChain and cloud integrations.
- Prototyped **NLP-based solutions** for summarization, classification, and chatbot interactions.

Freelance Software Developer

Upwork | Miami, FL | Feb 2023 – Nov 2023

- E-commerce Web App: Designed and deployed a scalable online store with secure checkout, payment integration, and product management dashboard.

Jerry W. Pierre

- **Life Coaching Consultation Website:** Built a responsive, SEO-optimized platform with booking functionality, secure contact forms, and integrated email marketing.
- Developed **custom Pine Script and MQL5 trading algorithms**, including risk management features and backtesting reports for clients.
- Created deployment guides and optimization documentation for trading platforms like MetaTrader.

Product Engineer

Vossen Wheels | Miami, FL | Feb 2018 – Feb 2022

- Designed custom-fit wheel models using **SolidWorks**, aligning production with precise manufacturing tolerances.
- Automated Excel processes for fitment and production data, improving workflow efficiency and accuracy.
- Partnered with cross-functional teams to troubleshoot high-complexity production challenges.

PROJECTS

Patterned.work
